SUMMARY

Dedicated IT student from Bulacan Agricultural State College with experience in developing academic and client-based systems, skilled in web development, database management, and system analysis, and capable of working in teams to build practical, user-friendly solutions.

PROJECT

Evacuation Mapping Solution for Office of the Municipal Disaster Risk Reduction and Management Officer of San Ildefonso, Bulacan (PRESENT)

- Developed a web and mobile-based evacuation management platform for the MDRRMO of San Ildefonso with real-time evacuation center navigation and occupancy monitoring.
- Replaced manual paper-based and group chat processes with a centralized dashboard for real-time monitoring of evacuees, evacuation centers, and disaster announcements.

University Student Council Grievance Desk Web System

- Enables students to submit grievances and reports to the University Student Council digitally.
- Allows administrators to manage, organize, and handle reports through an automated web-based system.

Graduate Studies Library System

- Developed a website for the Graduate Studies Library of Bulacan Agricultural State University to manage library resources digitally.
- Implemented basic CRUD functionalities for efficient book record management and organization.

Smart Borrowing System

- Designed a system concept intended for faculty borrowing and monitoring processes within BASC.
- Planned features for tracking borrowed items and improving accountability.

TECHNICAL SKILLS

- HTML, CSS, JavaScript
- PHP and MySQL
- Database Management
- System Analysis and Design
- C++, Python and Java basic understanding
- Documentation and Technical Writing
- Git and GitHub Version Control
- UI/UX Conceptual Design
- Microsoft Office Applications
